JERN14 DS

Made in Denmark

"Cast iron could well be the ultimate material for loudspeaker enclosures, especially when cast as a single piece, as here, in an unquestionable strong as well as acoustically promising near-spherical shape".

In Stereophile: "...the sound quality can rival speakers costing many times more its price".

"the combination of (JERN14 ES) compact cast iron satellite speakers with on or more simple powered sealed box REL T/5i subwoofers gets very close indeed to the state of art, at a fraction of either the price or the size of a serious speakersystem".

Audio Excellence in HiFi Critic volume 11 issue 1 www.hificritic.com.

Quotations from Paul Messenger, known from Stereophile, Hi-Fi Choice and HIFICRITIC MAGAZINE

"...possibly the very best imaging I've ever encountered."
"Cast iron could well be the ultimate material for loudspeaker enclosures..."

Now available in 4 colours:
Polar White
Casting Grey
Nordic Black
and Danish Red

Cast Iron has much better sound vibration damping than aluminium and MDF wood. So our cabinets vibrate less and are very silent.

The organic rounded shape cabinet reduces diffraction from edges.

Scanspeak D2008 tweeter improved with a wool felt damping plate.

The time correct cabinet let you hear the tweeter and woofer sounds at the same time.

New Scanspeak woofer-midrange with ± 2 dB frequency response up to 9 kHz!

Phase linear crossover using Mundorf capacitor and coil.

See www.jernspeakers.com or see more on Facebook, search for Jernspeakers.

The rubber ring allows you to change the tilt angle of the loudspeaker.

JERN Damping Plate: 23 kg / 50 lbs in Solid Cast Iron. Comes with 4 pcs M8 rubber feet to avoid marks on the floor. The Plate is bolted to the REL T/5i Subwoofer

Our JERN Speaker Stand has a 23 kg / 50 lbs Cast Iron Base Foot for sublime vibration damping. It is available in two versions: 95 cm / 3,11 feet and 115 / 3,77 feet. It has 4 pcs. M8 rubber feet.

Our JERN Tripods has Oak legs. Other wood on special order. The wooden legs meet in a Solid Cast Iron Plate, which is screwed into the JERN14 speaker for a rigid hold. A wooden ring is screwed to the legs.

The little JERN Tripod is made like the tall one. No wood ring.

The JERN Rubber Base is simple but clever. JERN14 can be tilted and turned for individual needs.

High quality casting in metal for Audi, BMW, Landrover, McLaren, Porche, Rolls Royce, Volvo and Jern Speakers

We have 40 years of experience in making high quality castings.

Maybe you already use one of our products today.
